**Mailing Address:** School of Chemistry and Biochemistry  
Georgia Institute of Technology  
MoSE 2100N  
Atlanta, GA 30332-0400 USA

**Telephone** (404) 385-4986  
**Fax** (404) 894-7452  
**e-Mail** AJ@AJArduengo.net  
**Born** Tampa, Florida, U.S.A.; 1952  
**Ancestry** Spanish  
**Citizenship** United States of America  
**Languages** English (mother tongue), German (fluent), Latin  
**Education** Bouldercrest & Meadowview Elementary School; Atlanta, Georgia  
Walker High School; Atlanta, Georgia  
B.S., Chemistry (*cum laude*), Georgia Institute of Technology, 1974  
Ph.D., Chemistry, Georgia Institute of Technology, 1976

### Professional Experience

2020–present *Professor of the Practice*, Georgia Institute of Technology.  
2018–present *Professor Emeritus*, The University of Alabama.  
2015–present co-Founder and North American Organizer for *STANCE – TECHNOLOGY FOR A SUSTAINABLE CHEMICAL ECONOMY*  
2013–present Founder and CEO, Innovative Valency, LLC.  
1999–2017 *Saxon Professor of Chemistry*, The University of Alabama  
1999–present Adjunct Professor of Chemistry, Technische Universität Carolo Wilhelmina  
1984–1998 Research Staff, Research Leader, and Research Fellow, E. I. du Pont de Nemours & Co., Central Research and Development Dept.  
1977–1984 Assistant Professor of Chemistry, University of Illinois – Urbana  
1976–1977 Research Staff, E. I. du Pont de Nemours & Co., Central Research and Development Dept.

### Professional Societies and Selected Honors:

- Member of the *American Chemical Society*  
Member of *Gesellschaft Deutscher Chemiker*
- Member of *Sigma Xi*
- Member of the Editorial Board of the *Journal of Heteroatom Chemistry*, 1990-present
- Member of the Editorial Board of *Chemical Reviews*, 1991-2006
- Member of IUPAC, Commission on Inorganic Nomenclature, 1990-1995
- Alexander von Humboldt Senior Research Prize, 1996
- 1996 Gold Medal for "Excellence in Main Group Chemistry Research," The International Council on Main Group Chemistry
- Chute Lectureship, Dalhousie Univ., October 1999
- Fellow – American Association for the Advancement of Science
- Humboldtian on Campus for the Alexander von Humboldt Foundation
- Charles Knight Lectureship Univ. of Akron 2013
- Alexander von Humboldt "Wiedereinladung" 2014
- Special Guest Professorship – Johannes Gutenberg Universität Mainz 2015 - Present
- Special Guest Professorship – Hiroshima University 2018 - Present

### **Research Interests and Outreach Activities:**

Professor Arduengo's interests are material science in nature and lie at the interface of organic, and inorganic chemistry. Activities focus on the chemistry of new or unusual bonding arrangements, catalyst development, and sustainable chemistry. Accomplishments include (1) the first planar T-shaped, 10-electron 3-coordinate bonding arrangement at phosphorus, (2) the edge inversion process, (3) the first stable examples of several important classes of ylides such as carbonyl, chloronium ylides, and nitrile ylides, (4) the first synthesis and structural characterization of a stable carbene, (5) the first stable, structurally characterized, imidazolin-2-ylidene carbene, (6) the first isolated and structurally characterized thiazol-2-ylidene carbene, and (7) a commercial polyimide film (Kapton<sup>®</sup>-ZT). Professor Arduengo participates as a member of international programs in order to foster student exchanges and international outreach opportunities. These activities include participation in Japanese-American Core-to-Core program. In Germany, Arduengo hosts a Study and Research Abroad experience for University of Alabama students to study at various German universities during the Spring Semesters. Professor Arduengo holds instruction in a number of chemistry courses and German language allowing participating U.S. undergraduate students to obtain international experience while remaining on track for their degree date. Professor Arduengo is a co-founder and North American coordinator of the *STANCE* consortium (Technology for a Sustainable Chemical Economy) focusing on sustainable chemical technologies employing biomass. Since retirement, research efforts in the Arduengo have added a significant focus in the pharmaceutical synthesis area as a partner in the *Medicines for All Institute*.
